ance Notes on Codes and Abbreviations" appearing at the begin-  
ning of each regular issue of the PCT Gazette.

(54) Title: PROFILED BAR WITH A RAISING MECHANISM FOR A WINDOW OR DOOR COVERING

(57) Abstract: A bar intended for fixing to the  
topside of a window or door comprises: a first  
cavity for accommodating a raising mechanism for  
raising cords for a covering for the window, which  
internal cavity is accessible from outside via holes  
in the bar for passage of a control cord and at least  
two cords which are connected for driving to the  
underside of the covering; a second cavity which  
extends in the longitudinal direction and which  
debouches via a constriction onto the outside of  
the bar, and serves to receive the upper edge of  
the covering which fits into the second cavity but  
is too wide to pass through the constriction; two  
profiles which together bound the first cavity, in at  
least one of which profiles said holes are present.
